

# 3-Season Plan

As you can see, this garden is packed with plants. It may look like a jumble on paper, but it translates into a beautiful garden. And be sure to notice, this is a garden that does well even in northern climates — most of the plants are hardy to at least USDA zone 5. Also, go ahead and let them reseed. It'll give the plan a fresh new look each year. So use the list and plan as a starting point and let the seeds fall where they may! □
